A clear choice

effective, discreet,
comfortable

nivellipso is an aesthetic alternative to fixed braces. The aligner system works with virtually invisible plastic splints that gently – but effectively – move your teeth to the desired position.

More effective

In addition to the teeth and interdental spaces, nivellipso aligners also partly cover the gingiva – for precise and efficient results.

Uncompromising transparency

nivellipso aligners are made of high-grade biocompatible polymers that impress users and practitioners by virtue of their maximum transparency – an exceptionally aesthetic solution.

Greater comfort

A 3-splint system with different material thicknesses ensures consistent and improved wear comfort – truly an exceptional innovation aimed at maximising wear comfort.

You are beautiful

The easy way to
an attractive smile

A bright smile opens hearts and doors. People with an open smile appear more self-confident and are often more successful.

Today, having beautiful, healthy and straight teeth without the use of fixed braces need no longer be only a dream. The innovative nivellipso aligner system from Switzerland makes this

dream a reality. The aligners discreetly bring crooked teeth to the right position. nivellipso: the gentle, effective and virtually invisible method for straight teeth and a radiant smile.

We love your smile

A new smile,
thanks to nivellipso

Many satisfied patients have already used our virtually invisible treatment method to get a more attractive smile. Here's what Saskia has to say:

Saskia Stauffer, 27

"My *buck teeth* have always upset me. That's certainly not the way I wanted to look as a bride. Thanks to nivellipso, I was ready for the big day in time. I was absolutely carefree at my wedding and could smile away into the camera. I'm totally delighted with the fantastic wedding snaps."

- **Treatment duration:** 9 months*
- **Diagnosis:** protrusion/rotation and tilting of upper and lower jaw/Front teeth with crowding in the region of the posterior teeth

* Depending on the scope and extent of the required corrective measures, the success, duration and cost of treatment may vary for each clinical case.

Smiles made in Switzerland
